Download eBook Motor Control: Translating Research into Clinical Practice Full Pages Details Details Product: Motor Control is the only text to bridge the gap between current motor control research and its applications to clinical practice. The text prepares therapists to examine and treat patients with problems related to balance, mobility, and upper extremity function, based on the best available evidence supporting clinical practice. This edition provides the latest research findings and their clinical applications in postural control, mobility, and upper extremity function. Drawings, charts, tables, and photographs are also included to clarify postural control and functional mobility, and laboratory activities, and case studies are provided to reinforce key concepts. Videos on the back of book DVD examine motor control deficits, including deficits in postural control, mobility, and upper extremity function in different types of neurologic pathology (stroke, cerebellar pathology, cerebral palsy, and Parkinson's disease) as well as in balance impaired elders. These videos can be viewed in their entirety or in the following segments: impairments, postural control, mobility, and upper extremity control. This video enhances the clinical coverage found in the textbook. When you need to translate something quickly, you don’t want the hassle of having to track down and register for a semi-decent online translator. So here are 10 quick, easy, reliable and, most importantly, free translating services online.Google TranslateGoogle Translate is many web users’ first port of call when they need to translate languages. It’s free, pretty accurate and, like Google’s other products, also very easy to use. It’s also huge, allowing users to translate English to Afrikaans, Amharic, Chichewa and many more languages.CC BY 2.0/jonrussell/Flickr Bing TranslatorMicrosoft has a translator, too, and it allows users to speak aloud for a translation into another language. You can choose whether to hear this in a male or female voice, and you can also search the web for it.CC BY-SA 2.0/bpedro/Flickr SDL Free TranslationSDL Free Translation is known primarily for document translation, although that particular service isn’t free. However, instant translation of shorter texts written in upwards of 45 languages is.CC BY-SA 2.0/blieusong/Flickr Translate.comTranslate.com has dozens of languages, as well as support for both text and audio input and output. You can even ask a human to check the results, and they’ll personally translate the first 100 words for free.CC BY 2.0/timtak/Flickr OmegaTOpen-source OmegaT is a computer-assisted translation service based on AI memorization. Unicode (UTF-8) supports non-Latin alphabets (like Cyrillic, Mandarin and Arabic), and other features include spell-checking and compatibility with other apps.CC BY-SA 2.0/andryn2006/Flickr DeepL TranslatorDeepL automatically provides sentence completion suggestions, which can help in more instances than you’d think. It also offers synonyms in a target language for each individual word translated.CC BY 2.0/Karen Roe/Flickr Babylon Online TranslatorBabylon offers translation between more than 30 languages, and is known for its high level of accuracy. Like Translate.com, it also offers a human translation service (for a fee).CC BY-SA 2.0/quinn.anya/Flickr PROMT Online TranslatorAlthough its language coverage is relatively limited, PROMT has some great features. Automatic language detection, dictionary access, a virtual keyboard (for tablets) and downloadable software all make this site worth your while.CC BY 2.0/Damian Gadal/Flickr Collins Dictionary TranslatorDid you know this popular online dictionary also offers a translation service? It’s pretty basic, and it relies of Microsoft’s Bing Translation, but it supports translation between 30+ languages, and has a convenient copy button for the results.CC BY 2.0/Phil and Pam/Flickr ImTranslatorThere are a lot of choices when it comes to online translators, each with their own pros and cons. What if you could combine them all? That’s exactly what ImTranslator does. Users are able to compare translations between PROMT, Bing and Google, and also reverse translate to the original language for accuracy.CC BY-SA 2.0/Bram.Koster/Flickr MORE FROM QUESTIONSANSWERED.NET People use the Internet to research a myriad of things from what they should buy to why they have pain. These guidelines will help you learn how to research your symptoms online if you have concerns.Use a Medical MD Symptom CheckerAs soon as you enter the phrase, “how to research health symptoms,” into any search engine, you’ll receive results for at least one or more reputable medical MD symptom checkers. These symptoms checkers ask your age, gender, primary symptoms, if you’re pregnant, the severity of your symptoms, your current medications and past or current conditions. Once you click submit, a list of conditions that match your symptoms will appear. You’ll have the option to edit your symptoms or start over if you wish.Check Reputable WebsitesIf you can’t find what you’re looking for using a free medical symptom checker, there are websites with articles or blog posts that list symptoms. Make sure you’re looking at reputable websites that end with .org or .edu because these sites tend to contain scholarly or medical information that can be trusted. The Internet is full of information that’s published and not verified. Therefore, it’s essential that you’re looking up symptoms on a website that presents information that’s been fact-checked.Go to a Doctor’s WebsiteUnder some circumstances, you’ll find an online symptom checker on a physician’s website. If you can’t find a MD symptom checker, you’ll find a plethora of resources on these websites. Doctors work diligently toward providing information for their patients in the way of medical library research materials, informational articles, blog posts and podcasts. Therefore, if you can find a symptom checker, you should be able to find information about the symptoms you’re experiencing.Visit ForumsSometimes it helps to hear what others are experiencing when you’re undergoing symptoms that don’t match up with the search results you’ve found. Therefore, it’s time to check out user forums. These discussion areas contain experiences from users who go into detail about the symptoms they’re having, what’s happening throughout their experience and if they’re having successful or unsuccessful treatment. Be cautious, though, as these forums will not replace medical advice and may lead to more worry than help.Check Out Question-and-Answer WebsitesMuch like a discussion forum, these websites are where users post specific questions to other users regarding issues they’re experiencing. Under many circumstances, these questions pertain to symptoms they’re experiencing and where they can find resources. Other users will help them find pertinent information regarding their specific symptoms when they feel they’ve exhausted every other avenue. MORE FROM QUESTIONSANSWERED.NET
